ABOUT THE SINGLE

Long John Silver - Moon Construction Kit

Released on May 2, 2025

1 track, 4 minutes 25 seconds

Indie Rock, Indie Pop, Dream Pop

LONG JOHN SILVER

Long John Silver is an epic and hypnotic journey into duality. With its haunting melodies and retro-futuristic production, the track's cinematic depth echoes the main character's shifting nature.

Crafted with Moon Construction Kit's signature dreamlike atmosphere, Long John Silver feels like a lost treasure from another era - one that washes over you like Technicolor waves on the 1950s Italian Riviera. A song that lingers in the air like a ghostly sea breeze, it carries echoes of Olivier's signature synth-infused storytelling, transporting listeners to a world both distant and familiar.

ABOUT THE ARTIST

Moon Construction Kit is the one-man project of Olivier Cornu, a musician and songwriter exploring the intersection of alternative pop, synthpop, cinematic textures, and late 60s influences.

With a fascination for timeless, otherworldly aesthetics, his music blends dreamy harmonies and immersive soundscapes, creating a universe where the past and future collide.

In 2022, Moon Construction Kit debuted with a six-track EP, introducing a unique sonic identity rooted in retro-futuristic atmospheres. While Long John Silver stands alone as an evocative soundscape, it's also a glimpse into the evolving musical universe of Moon Construction Kit. This is just the beginning of another sonic odyssey - an upcoming full length album - promising more sonic landscapes where nostalgia and modernity intertwine.

Produced by : Olivier Cornu

Mixed by : Guy Britton
